

STAT550 Homework No 2: Advise for the case “...”

Son Luu (id), Xihan Qian (id) and Javier Mtz.-Rdz. (94785938)

March 1, 2024

Introduction

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Data Description and Summaries

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

```
print("hello world")
```

```
[1] "hello world"
```

You can add options to executable code like this

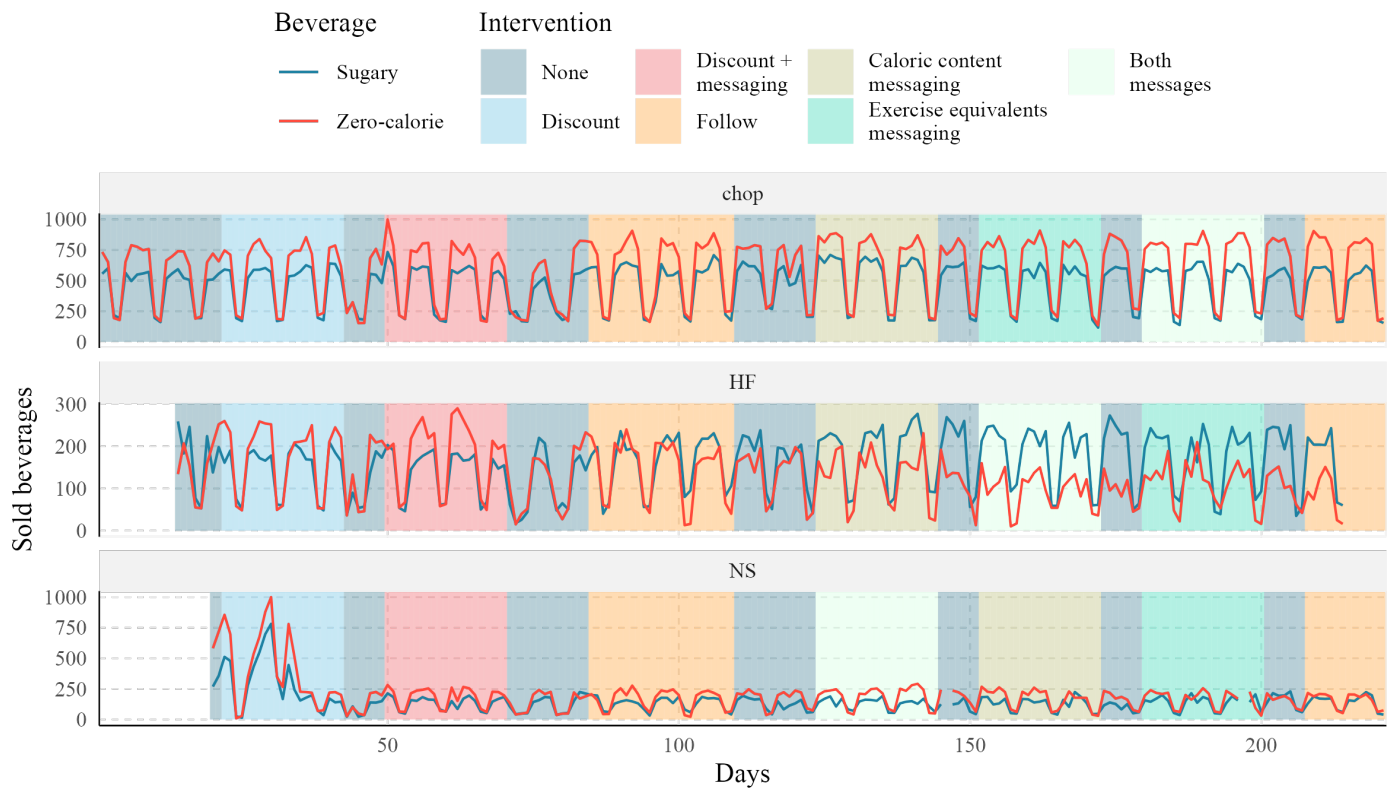

```
[1] 4
```

```
[1] "hello world"
```

The `echo: false` option disables the printing of code (only output is displayed).

Exploratory Analysis

Start

Source: client submission.

Figure 1: Sale of sugary and zero-calorie drinks by intervention

Notes:

- Different start
- Questions regarding db.
- Intervention order.
- Non-integers in some totals.

Formal analysis

Conclusion
