Introduction

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

Data Description and Summaries

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

Exploratory Analysis

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:
